It's Clear... The Donaldson TopSpin™ Pre-Cleaner Can Maximize Your Intake System

Donaldson TopSpin™ will extend primary air filter life, boost system efficiency and extend engine life!

The see-through unit lets you view

Donaldson TopSpin in operation and works
great on all types of equipment, from
crawler tractors to farm tractors to skid
steer loaders.

Donaldson TopSpin Extends the Life of Your Air Filter

If your vehicle already has a precleaner, you obviously recognize its importance. A pre-cleaner will extend your air filter's life, reducing your filter and overall operating costs. Donaldson TopSpin will separate a greater amount of debris and contaminant compared to competitive products.

Separates up to 85% of incoming contaminant (per ISO 5011/SAE J726)

Greatly extends air filter life Reduces air filter usage Lowers cost per operating hour Automatically ejects mixed debris Separates more than 99% of particles 20 micron and larger

Operates at a lower RPM

Less noise Longer bearing life Lower restriction

Self-cleaning/self-scavenging

No maintenance to clean bowl No exhaust ejector required

Easy installation

Quick installation One clamp to tighten No wires or power requirements

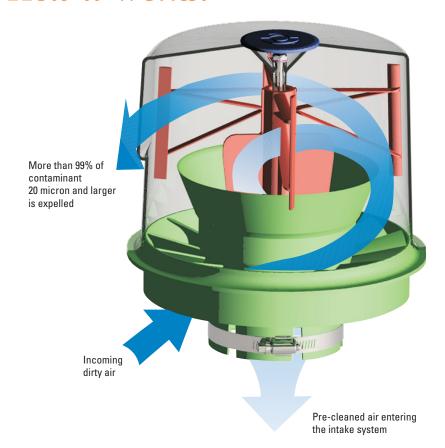

Dual mounted bearings

More robust design Extends bearing life

Lighter Weight

Lighter than competitive pre-cleaners Lighter than Donaldson full-view pre-cleaner

How it Works!

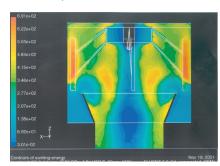

TopSpin™ products are protected internationally by patents, trademarks, and design registrations, both issued and pending.

The aerodynamically designed TopSpin™ is made of a lightweight, durable, non-corroding material which makes it tolerant to all weather and operating conditions.

During the product development process, Donaldson engineers used sophisticated flow analysis tools (Fluent CFD) to predict and simulate real-life flow conditions. Flow direction, velocity ranges, recirculation zone identification, and particle tracking and efficiency can be predicted with this analytical tool.

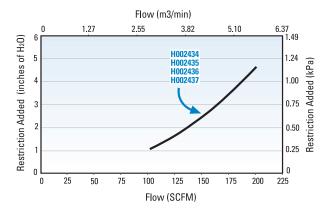

This CFD image was taken during the development process of Donaldson TopSpin.

Performance Curves

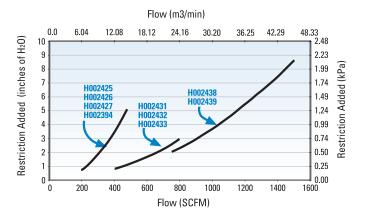

The Donaldson TopSpin pre-cleaner has the lowest restriction of any competitive brands tested, including our own full-view pre-cleaner.

Multiple tests conducted per ISO 5011/SAE J726 and average results are shown in charts below.

Lower restriction means:

- Your engine "breathes" easier
- You can reduce air filter usage
- You will have lower costs per operating hour
- More dust loaded on the filter when serviced by restriction

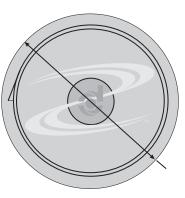

Dimensional Specifications

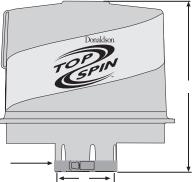

Donaldson TopSpin can be mounted horizontally or vertically. Installation instructions, stainless clamp and warranty are included.

SCFM = Standard Cubic Feet per Minute. The ISO 5011/SAEJ726 test procedure was used to extract the results in the charts above. The ISO 5011/SAEJ726 is a widely accepted industry test used by OEMs to evaluate the efficiency of the intake system components. Test results are an average from testing several units.

Eliminate Bowl Dumping!

If your equipment has one of Donaldson's original full-view pre-cleaners, switching to a TopSpin Pre-Cleaner can eliminate the routine task of emptying the bowl.
